

I'm already a victim of this type of ridiculous propaganda with my home satellite. This country preaches freedom and how good it is, but everyday they take another choice away from you and me. I should be able to buy or see the broadcast I want as that is my right as a American citizen. If local stations actually played music instead of commercials they might actually have listeners. This country is driven by greed, not freedom. We spend more time fighting each other trying to keep our freedoms and choices than we spend fighting the real issues. I vote lets keep this country free and stop all the B.S.. I bought my satellite radio to listen to the programs they offer and that is my right as a American citizen, or did the laws change ???!

Thanks Mike
